

Aurora AIS- PMIC Network Audio

Aurora AIS- PMIC is designed with elegant cast aluminum panel and cold rolled sheet shell. It converts the input analog audio signal into IP audio stream output, thus can realize remote control and management of terminal equipment. The IP network paging station has built-in Android system, up to 8G flash storage. 8 SIP lines enable free phone calls. WiFi enables more network mode capability. Built-in 5W speaker and microphone enable easy communication, announcement receiving and monitoring. User-friendly UI enables easy contacts control. The IP Microphone supports RTP multicast paging, point to point and zone paging. It's ok to download and upload files via FTP sever and USB disk. There are two audio in, one audio out to provide multi paging solutions. It supports real-time monitoring and speaking while playing music, which can be widely used in VoIP, security and public address system fields.
